AUTHOR INDEX

Bajpai, S. N.
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Barker, R. H.
Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Bauerle, G. L.
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Oxidation of Methane at Elevated Pressures II. A Reaction Mechanism, p. 190

Brenner, W.
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Butler, C. P.
A Schlieren System for Fire Spread Studies, p. 4

Campbell, A. S.
Fire Spread Over Paper, p. 167

Castle, G. K.
The Nature of Various Fire Environments and the Application of Modern Material Approaches for Fire Protection of Exterior Structural Steel in Them, p. 203

Chien, W. P.
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Day, M.
Carpet Flammability: A Pill Ignition Text Procedure Employing Auxiliary Radiant Heating, p. 268

Drews, M. J.
Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Fanter, D. L.
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

Fristrom, R. M.
Chemistry, Combustion and Flammability, p. 289

Hartstein, A. M.
Thermal Oxidative Degradation Studies of Woods, p. 243

Hilado, C. J.
Self-Heating of Organic Compounds With Thermal Insulation, p. 321

Kaufman, J.
Thermal Oxidative Degradation Studies of Woods, p. 243

Kratzer, R. H.
Thermal Oxidative Degradation Studies of Woods, p. 243

Levy, R. L.
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

Lott, J. L.
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Oxidation of Methane at Elevated Pressures II. A Reaction Mechanism, p. 190

Mitton, M. T.
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Nakahara, J.
Thermal Oxidative Degradation Studies of Woods, p. 243

Nelson, G. L.
Smoke Evolution: Thermoplastics, p. 125

O'Mara, M. M.
The Combustion Products from Synthetic and Natural Products, p. 34

Paciorek, K. L.
Thermal Oxidative Degradation Studies of Woods, p. 243

Pensa, I. E.
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Perrins, L. E.
Measurement of Flame Spread Velocities, p. 85

Pettett, K.
Measurement of Flame Spread Velocities, p. 85

Rangaprasad, N.
The Piloted Ignition of Cotton Fabrics, p. 107

Schmitt, C. R.
Carbon Microspheroids as Extinguishing Agents for Metal Fires, p. 223

Seader, J. D.
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Sello, S. B.
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Sliepcevich, C. M.
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Oxidation of Methane at Elevated Pressures II. A Reaction Mechanism, p. 190

The Piloted Ignition of Cotton Fabrics, p. 107

Smith, E. E.
Model for Evaluating Fire Hazard, p. 179

Stepniczka, H.
The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Sumi, K.
Smoke-Producing Characteristics of Materials, p. 64

Tsuchiya, Y.
Smoke-Producing Characteristics of Materials, p. 64

Welker, J. R.
The Piloted Ignition of Cotton Fabrics, p. 107

Wiles, D. M.
Carpet Flammability: A Pill Ignition Test Procedute Employing Auxiliary Radiant Heating, p. 268

Williams, F. A.
A Unified View of Fire Suppression, p. 54

Wolf, C. J.
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

SUBJECT INDEX

Auxiliary Radiant Heating
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Calorimetry
Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Carbon Dioxide
The Combustion Products from Synthetic and Natural Products, p. 34

Carbon Microspheroids
Carbon Microspheroids as Extinguishing Agents for Metal Fires, p. 223

Carbon Monoxide
The Combustion Products from Synthetic and Natural Products, p. 34

Carpet Flammability
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Carpet Ignitability
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Cellulose
Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Char Formation
Chemistry, Combustion and Flammability, p. 289

Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Smoke Evolution: Thermoplastics, p. 125

Coated Materials
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Combustible Liquids
Self-Heating of Organic Compounds with Thermal Insulation, p.321

Combustible Vapors
Self-Heating of Organic Compounds with Thermal Insulation, p.321

Combustion
Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Combustion, Polymer
The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Combustion Products
The Combustion Products from Synthetic and Natural Products, p. 34

Combustion Suppression
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Combustion Thermodynamics
Chemistry, Combustion and Flammability, p. 289

Damkohler Number
A Unified View of Fire Suppression, p. 54

Density, Effect of
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Differential Thermal Analysis
Thermal Oxidative Degradation Studies of Woods, p. 243

Diffusion Controlled Flame
Fire Spread Over Paper, p. 167

Diffusion Flames
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Drip Behavior, Effect of
Smoke Evolution: Thermoplastics, p. 125

Dry Chemical Fire Extinguishers
Carbon Microspheroids as Extinguishing Agents for Metal Fires, p. 223

Extinction Concentrations
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Extinguishing Agents
Carbon Microspheroids as Extinguishing Agents for Metal Fires, p. 223

Extinguishment
A Unified View of Fire Suppression, p. 54

Fabric Flammability
The Piloted Ignition of Cotton Fabrics, p. 107

Fire Environments
The Nature of Various Fire Environments and the Application of Modern Material Approaches for Fire Protection of Exterior Structural Steel in Them, p. 203

Fire Hazard
Model for Evaluating Fire Hazard, p. 179

Fire Hazard Measurement
Chemistry, Combustion and Flammability, p. 289

Fire Model
Model for Evaluating Fire Hazard, p. 179

Fire Protective Materials
The Nature of Various Fire Environments and the Application of Modern Material Approaches for Fire Protection of Exterior Structural Steel in Them, p. 203

Fire Retardants
Measurement of Flame Spread Velocities, p. 85

Fire Spread
Fire Spread Over Paper, p. 167
A Schlieren System for Fire Spread Studies, p. 4

Fire Suppression
A Unified View of Fire Suppression, p. 54

Flame Instability
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Flame Retardants
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Flame Spread Velocity
Measurement of Flame Spread Velocities, p. 85

Flame Temperature
Measurement of Flame Spread Velocities, p. 85

The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Flammability Tests
Chemistry, Combustion and Flammability, p. 289

Fuel Evolution
Smoke Evolution: Thermoplastics, p. 125

Gas Chromatography
The Combustion Products from Synthetic and Natural Products, p. 34

Halon Air Mixtures
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Heat Flux Data
The Nature of Various Fire Environments and the Application of Modern Material Approaches for Fire Protection of Exterior Structural Steel in Them, p. 203

High Pressure
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Oxidation of Methane at Elevated Pressures II. A Reaction Mechanism, p. 190

Ignition
The Piloted Ignition of Cotton Fabrics, p. 107

Ignition Delay
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Impregnation Treatments
Thermal Oxidative Degradation Studies of Woods, p. 243

Intumescent Coatings
The Nature of Various Fire Environments and the Application of Modern Material Approaches for Fire Protection of Exterior Structural Steel in Them, p. 203

Light Obscuration
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Limiting Radiant Heat of Ignition (LRHI)
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Liquid Fuels
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Mass Optical Density
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Mechanisms of Extinction
A Unified View of Fire Suppression, p. 54

Metal Fires
Carbon Microspheroids as Extinguishing Agents for Metal Fires, p. 223

Methane
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Oxidation of Methane at Elevated Pressures II. A Reaction Mechanism, p. 190

Methenamine Pill Test
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Model
Model for Evaluating Fire Hazard, p. 179

NBS Smoke Density Chamber
The Combustion Products from Synthetic and Natural Products, p. 34

Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Nylon Carpets
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Optical Density
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Smoke Evolution: Thermoplastics, p. 125

Optical Density Measurements
The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Optics
A Schlieren System for Fire Spread Studies, p. 4

Organic Compounds
Self-Heating of Organic Compounds with Thermal Insulation, p. 321

Oxidation
Oxidation of Methane at Elevated Pressures I. Ignition Delay, p. 136

Oxidation of Methane at Elevated Pressures I . A Reaction Mechanism, p. 190

Oxygen-Enriched Atmospheres
The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Oxygen Index
Chemistry, Combustion and Flammability, p. 289

Paper
Fire Spread Over Paper, p. 167

Phosphorus Compounds
Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Pill Ignition Test
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Plastics
Smoke-Producing Characteristics of Materials, p. 64

Polyester/Cellulosic Fiber Blends
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Polymer Combustion, Chemistry of
Chemistry, Combustion and Flammability, p. 289

Polymers
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

Measurement of Flame Spread Velocities, p. 85

The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Polypropylene Carpets
Carpet Flammability: A Pill Ignition Test Procedure Employing Auxiliary Radiant Heating, p. 268

Pyrolysis
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

Pyrolysis and Combustion of Cellulose Part VI. The Chemical Nature of the Char, p. 116

Pyrolysis Mechanisms
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Rates of Combustion
The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Reaction Mechanism
Oxidation of Methane at Elevated Pressures II. A Reaction Mechanism, p. 190

Release Rates
Model for Evaluating Fire Hazard, p. 179

Residue Number (Nr)
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Self-Heating
Self-Heating of Organic Compounds with Thermal Insulation, p. 321

Smoke
Model for Evaluating Fire Hazard, p. 179

The Combustion Products from Synthetic and Natural Products, p. 34

Smoke Formation
Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Smoke Evolution: Thermoplastics, p. 125

Smoke Generation
The Influence of Oxygen-Enriched Atmospheres on the Combustion Behavior of Polymers, p. 16

Schlieren
A Schlieren System for Fire Spread Studies, p. 4

Smoke Production
Smoke-Producing Characteristics of Materials, p. 64

Smoke Tests
Smoke-Producing Characteristics of Materials, p. 64

Smoldering
The Combustion Products from Synthetic and Natural Products, p. 34

Soot Formation
Smoke Evolution: Thermoplastics, p. 125

Spontaneous Heating
Self-Heating of Organic Compounds with Thermal Insulation, p. 321

Steel, Exterior Structural
The Nature of Various Fire Environments and the Application of Modern Material Approaches for Fire Protection of Exterior Structural Steel in Them, p. 203

Temperature
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

Temperature, Initial, Effect of
Fire Spread Over Paper, p. 167

Temperatures, Pool
An Investigation of the Extinction of Diffusion Flames by Halons, p. 255

Temperature Scale
A Schlieren System for Fire Spread Studies, p. 4

Thermal Decomposition
Determination of the True Decomposition Temperature in Pyrolysis Experiments, p. 76

Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Thermal Insulation
Self-Heating of Organic Compounds with Thermal Insulation, p. 321

Thermal Oxidative Degradation
Thermal Oxidative Degradation Studies of Woods, p. 243

Therogravimetric Analysis
Flammability Behavior of Polyester/ Cellulosic Fiber Blends, p. 227

Thermal Oxidative Degradation Studies of Woods, p. 243

Thermoplastics
Smoke Evolution: Thermoplastics, p. 125

Thickness, Effect of
Fire Spread Over Paper, p. 67

Mass Optical Density as a Correlating Parameter for the NBS Smoke Density Chamber, p. 151

Smoke Evolution: Thermoplastics, p. 125

Toxic Gas
Model for Evaluating Fire Hazard, p. 179

Wood
The Combustion Products from Synthetic and Natural Products, p. 34

Wood, Southern Yellow Pine
Thermal Oxidative Degradation Studies of Woods, p. 243
